DETAILED ACTION

Status of Claims

1. Claims 5-6 are cancelled. Claim 10 is added. Claims 1-4 and 7-10 are pending and under examination.

Claim Objections

2. Claim 10 is objected to because of the following informalities: step d) of the claim recites "preparation of total RNA from said cultured electroporated cells after step d;". The cited method step is referring to itself. Additionally, the claim is also objected to due to the recitation "a concentrations" [emphasis added], as noted in step b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4 and 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear from the claims of the structural and biological composition or product that is encompassed by the designation "Product R". It is noted that the claims infer that "Product R" is a "synthesized preparation that contains a mixture of peptide nucleic acids, breakdown components of bovine, and free nucleosides". However, this inference does not adequately provide clarity on the product that is encompassed by "Product R". Currently, as written, Product R can be any product that is synthesized from the noted ingredients, regardless the method of preparation and the amount used. It is also noted that the specification teaches of two different methods of making Product

R. However, the specification does not teach the identity of the product that is encompassed by Product R. This is further exemplified by Applicant's admission, see page 4, starting at line 15 of the specification. The specification clearly acknowledges that "little is know about the chemical nature of RETICULOSE®.¹¹ Thus, due to the clack of clarity for the identity, both structural and biological, of the product that is designated as "Product R", the claims are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Additionally, newly added claim is also indefinite for the absence of a correlative method step that would provide a nexus between the intended purpose of the method, as expressed in the preamble of the claim, and the achievement that is accomplished with the implementation of the method steps.

Conclusion

5. All pending claims are allowable upon presentation of an amendment that properly addresses the stated rejection(s) or objection(s).

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
